This is to recommend Dr. Ijaz Jamall for work as a consultant or expert witness on environmental matters.

Dr. Jamall assisted me recently in both capacities on a major environmental lawsuit in Sacramento. He is an excellent scientist who also has a thorough knowledge of how to work with the government agencies that oversee environmental cleanups – a rare combination. His usefulness as a witness is enhanced by his ability to explain complex scientific matters in simple language (flavored with lively metaphors) easily understood by judges and jurors. In my experience, very few experts can do this.

I highly recommend him.
