June 22, 2009

Crowley Marine Services, Inc. (Crowley) has used Risk-Based Decisions, Inc. (RBDI) to investigate and obtain regulatory closure at multiple sites over approximately a decade. The projects included solvent, PCB and metal-impacted water front industrial sites, bulk oil terminals and property acquisitions. In every instance, RBDI outlined an approach for Crowley that lead to regulatory approval and closure – “spending money towards closure not more studies”. In some projects, Crowley was able to re-classify hazardous waste as non-hazardous based on testing and negotiations with the regulators; in others RBDI used a risk-based approach to obtain “No Further Action” letters from the regulatory agencies without any remediation. The expertise, professionalism and importantly, the focus on obtaining cost-effective closure, distinguishes RBDI from most other environmental consulting firms.
